

## ENVIRONMENTAL POLICY Year 2022

The Environmental Policy expresses the fundamental principles that inspire Arcoprofil S.r.l. in the definition of business strategies and in the search for production means and plants compatible, with respect for the environment.

- Comply with current regulations on environmental protection.
- Collaborate with all the bodies responsible for the management of environmental aspects.
- Constantly assess the environmental aspects relating to all company sites.
- Implement environmental improvement actions, in particular the optimization of energy consumption and the exploitation of renewable resources (photovoltaic).
- Evaluate the environmental aspects in the choice of new machines / plants.
- Disseminate the Environmental Policy to all company operators and to the outside world (Customers, Bodies, Associations), making themselves available for any requests for information and further information in relation to the company Environmental Management System.
- Evaluate and qualify the suppliers of goods and services in relation to the environmental management they apply.
- Continue to inform and train staff on environmental issues and on the actions to be applied to achieve the set improvement objectives.
- We avoid the use of Greenhouse gases trap heat in the atmosphere and contribute to global warming.
- We care of Water quality and consumption since it impacts on the access to clean water and the conservation for future generations.
- We care of Air quality, since the air pollution in the atmosphere impacts on the health of current and future generations.
- We support the Sustainable resource management and waste reduction, by optimizing the use of resources, with the goal to minimize waste and preserve them for future generations.
- We have adopted a responsible chemical management, by considering the life cycle of chemicals including handling, storage and disposal.
